PROFILE

He has been working on freelance software development and computer programming projects since 2018. In 2023, he started studying Electrical & Electronics Engineering at Dicle University. He is especially interested in embedded systems, FPGA, microcontroller-based automation, and Full-Stack web development. He also continues to improve his skills in these areas, focusing on FPGA architecture with VHDL.

EDUCATION

Dicle Üniversitesi

Bachelor of Electrical & Electronics Engineering
Cumulative GPA: 2.95/4.0

Oct, 2023 - Present (Expected June, 2027)

SKILL

- **Technical skill**

- HTML/CSS/JS (Intermediate)
- Python (Intermediate), C (Basic), C# (Basic), Java (Basic)
- API Development with Flask & FastAPI
- Database Management with SQLite
- Prototyping with Microcontrollers (Arduino UNO & ESP32)
- Familiar with VHDL (Basic syntax & Digital logic), FPGA Architecture
- Proteus (Circuit Design)
- Basic AutoCad (Technical Drawing)
- Basic Minitab/Taguchi (Data Analysis)
- Office Software (Microsoft Office 365)

- **Language**

- English B1 (Intermediate speaking, Intermediate writing)

- **Certificates**

- *Basic Level .NET API Development (by BTK Academy - 2025)*
